# FLORIN PANĂ

## PROFESSIONAL PROFILE

---

I am a fourth year student at Fontys ICT in Eindhoven, with over a year of working experience as an Angular developer. Thanks to the vast curriculum from the university, I also have hands-on experience with backend, DevOps, cloud services, Cyber Security, embedded systems, and media design. I have been passionate about ICT since high school, opting for an ICT rich education.

## WORK EXPERIENCE

---

### Intern Angular Developer - Bull44

February 2022 - June 2022

This internship has been part of my education in Fontys ICT and my first working experience in this domain. The small team from this start-up company helped me develop as a future software engineer by experiencing a real working environment, work in an Agile way, learn and work with Angular, and discover more about tools such as Mollie, Kubernetes, Google Cloud, and Typescript. I have also used my knowledge from the Cyber Security specialization semester to perform minor attacks and test the security of the web application.

### Junior Angular Developer - Bull44

July 2022 - March 2023

After the completion of my internship, I became the only employee responsible for the frontend of the Bull44 website. I was tasked with creating a mobile version of the web app, improving the user experience, visualisation, creation of new web pages and features, and radically optimizing the code.

## EDUCATION

---

### Fontys University of Applied Sciences: 2019 - 2024

Bachelor's degree in Information and Communication Technology: Software Engineering; Specialization in Cyber Security.

### Cantemir Vodă High School of Bucharest: 2015 - 2019

High school degree in advanced informatics. Certified proficiency in computer science by the Romanian ministry of education, proficiency in database fundamentals by Oracle, and European Computer Driving Licence diploma by ECDL Romania.
